ECPA Edinburgh 2017

11th European Conference on Precision Agriculture

Dear Fellow Precision Agriculturists,

24th August 2017

It is a little under 11 months until we look forward to welcoming you to Edinburgh for the 11th European Conference on Precision Agriculture. More importantly, it is now 7 weeks until abstract submissions for the conference close (October 12th), and without an abstract you will not have the opportunity to present your fabulous research at ECPA '17. If you have already pre-registered, please login to submit. For those of you who have not pre-registered, we do encourage you to do so at your earliest convenience at www.ecpa2017.com. Pre-registration is required for abstract submission. There is no charge for pre-registering.

Just a quick reminder that as well as the usual precision agricultural subject areas, we would like to strongly encourage submissions in the following areas with the intent of having dedicated sessions on;

- educational activities, needs and outcomes in precision agriculture
- contributions that address success in translational activities over the past two decades – After 20+ years, where have we made an impact in the real-world?
- site-specific pasture and grassland sensing and management

Full details on abstract submission are available on the website (and earlier newsletters). We are looking forward to receiving your abstracts in the near future.

We are also pleased to invite commercial companies and other organisations to let us know if they are interested in exhibition, sponsorship and demonstration. Further details are available on the website or by contacting info@ecpa2017.com.

Regards

Tony Waterhouse (SRUC)
Chair of the Organising Committee

James Taylor (Newcastle University)
Chair of the Scientific Committee
